

**2025-2026 Academic Year**

**Advanced Web Technology (CS-5307)**

## Mid-Term

**(10 Marks)**

1. \_\_\_\_\_ do not permanently maintain state information.  
A. Query strings  
B. Cookie strings  
C. Session strings  
D. Strings
2. Which PHP function is employed to redirect the browser to a new page?  
A. header ()  
B. redirect ()  
C. goto ()  
D. forward ()
3. How do you prevent a class from being extended in PHP?  
A. private class MyClass{}  
B. protected class MyClass{}  
C. final class MyClass{}  
D. sealed class MyClass{ }
4. What is the correct way to declare a global variable in PHP?  
A. \$variable = global;  
B. declare(\$variable);  
C. \$variable;  
D. global \$variable;
5. In PHP, sessions are created using the \_\_\_\_\_ function.  
A. session\_starts ()  
B. sessions\_start()  
C. session\_start()  
D. None of them
6. If the Secure attribute is set, the cookie is sent over \_\_\_\_\_.  
A. HTTPS  
B. HTTP  
C. HTTPS and HTTP  
D. None of them
7. When a file is opened using \_\_\_\_ mode, the data is written at the end of the file and the existing content is not deleted.  
A. w  
B. w+  
C. a  
D. r
8. You cannot \_\_\_\_\_ from files opened in w, a, and x mode!  
A. append  
B. read  
C. write  
D. All of them
9. What does the PHP upload error with value \_\_\_\_ (UPLOAD\_ERR\_INI\_SIZE) mean?  
A. 0 – No error,  
B. 1 – The uploaded file exceeds the upload\_max\_filesize directive in php.ini  
C. 2 – The uploaded file exceeds the MAX\_FILE\_SIZE directive specified in the HTML form  
D. 3 – The uploaded file was only partially uploaded
10. If the URL is page.php?user=admin&role=editor, which PHP superglobal should be used to read the values of user and role?  
A. \$\_POST['user'] and \$\_POST['role']  
B. \$ GET['user'] and \$ GET['role']

- C. \$\_SESSION['user'] and \$\_SESSION['role']
- D. \$\_COOKIE['user'] and \$\_COOKIE['role']

II. Describe how the following instructions can be implemented in a program.

- a) An Employee Payroll System where a parent abstract class Employee stores employee name and ID and provides a method to display basic information and an abstract method to calculate salary. Create child classes FullTimeEmployee and PartTimeEmployee that inherit from the Employee class and calculate salary in different ways. (**FullTimeEmployee** should calculate salary based on a **fixed monthly salary plus allowance** & **PartTimeEmployee** should calculate salary based on **hours worked and hourly rate**)

Write a PHP program that creates objects of both child classes,

```
$fullTimeEmp = new FullTimeEmployee("Aung Aung", "FT001", 800000, 200000);
```

```
$partTimeEmp = new PartTimeEmployee("Su Su", "PT001", 40, 15000);
```

calculates their salaries, and displays employee details and salary. **(8 Marks)**

- b) Write a PHP script to create a two-step registration form using hidden form fields and it saves the data entered at each step. **(7 Marks)**

**Step 1: Enter Username & Roll Number**  
  
Username:   
  
Roll Number:

**Step 2: Choose Your Technology**  
  
☒ PHP  
☐ Java

**Thank You!**  
  
Username: Ms Aye Aye  
Roll Number: 2  
Selected Technology: PHP

- c) Create a PHP script that:

- 1.Opens a file named example.txt in write mode (w).
- 2.Writes a short message to the file.
- 3.Closes the file.
- 4.Reopens example.txt in read mode (r) and displays the content on the page
